Head of School: Karen Lintin

Lundy home learning

Well done to all the children for a fantastic sports day! I am so proud of Lundy Class for their super effort, resilience and excellent behaviour.

The Y5 children have produced some excellent written work this week and have developed their editing/spell-checking skills. In maths all the children have been revisiting basic skills including column addition, subtraction and bus stop methods for division. Many of the children have completed their bags for their DT project - they are fantastic! Photos will follow when more children are finished. In science, the children have planned an investigation to find out about the effect of different exercises and recovery on heart rates. Y6 have also been learning some French this week.

Y6 Please remember there is no swimming on Monday. Please come to school wearing your normal uniform with PE trainers.

Y5 & 6 Home Learning

Reading

We expect you to read at least 5 minutes every day - you can read to an adult (as it's always good to read aloud to practise your expression), or talk to your adult about what you have read.

Science

Take your pulse rate every hour (or as many times as you can) for a day and record it e.g.
9am - 73 beats per minute

Find your pulse either in your neck or wrist. Remember to count the beats for 6 seconds and then times by 10 to find how many beats per minute.

What do you notice about your pulse rate at different times? Can you think what may have affected it?

Y5 and Y6

Revise your 7 and 8 times table, especially focusing on related division facts e.g. how many 7's in 49? How many 8's in 64? etc
