Exmoor Home Learning - 24.1.25

The children have had a good week working on our innovated piece of writing about the invention of the car, they produced some very informative texts, using the skills we have learned so far in the sequence. In maths, we practised collecting data and collating it on a table in preparation for the work we will be doing in our computing lessons. The children also did some recap work on rounding numbers. We did a lot of science work, and the children thoroughly enjoyed acting out the different particles in solids, liquids and gases.

Home learning:

In preparation for our independent writing piece in English, please pick an invention you would like to write about and research it. Make sure you find out about the history of the invention, who invented it, how it has developed over time and how it has changed the world.

Reading

We expect everyone to be reading at least five times a week. Please see the front of your home learning book for the expectations.

My Maths

Please practise all of your times tables up to 12, using my maths, times table rockstars, hit the button or any other methods you like.
