Tarka class learning

In maths we've been learning about 2D and 3D shapes, using language to describe the number of vertices and the number and type of edges each shape has. We look at groups of three shapes and discussed what was the same and what was different.

Tarka class had a fantastic science morning! Thank you to all the parents who volunteered their time, teaching us about the vital role science plays in the jobs they do.

Year 1 learnt about animal diets and had fun investigating "poo" to determine whether it belonged to an herbivore, carnivore, or omnivore. The year 2s used their trackpad skills on the laptops to sort pictures of information technology by their uses. In art, we made the most of the dry weather and went to the top of the field to sketch the landscape looking towards Codden Hill.

Reading:

Thank you to those of you who have logged your child's reading on Boom Reader. Please keep practising reading at home for 5-10 minutes **five times per week**. If your child has read 5 times for 4 weeks this half term they will receive a small prize next Friday.

Home Learning Task:

The children thoroughly enjoyed the science day this week. Home learning is to use your science skills. With a grown up, follow the link below to the Marvin and Milo website then pick and have a go at one of the experiments at home.
