Exmoor Home Learning - 17.1.25

We have had a good week; investigating friction in science and negative numbers in maths. The children really enjoyed testing the friction of different materials by rolling cars down a plank of wood to see how long it takes. In English, we have enjoyed exploring more of our book; working on fronted adverbials, expanded noun phrases and relative clauses. The children did some fantastic work in maths, exploring negative numbers, they played games and practised ordering the numbers on a number line.

Home learning:

Reading

We expect everyone to be reading at least five times a week. Please see the front of your home learning book for the expectations.

My Maths

Please complete the tasks I have set you on My Maths.
