Exmoor Home Learning – 13.6.25

We have had a good first week back, starting our new sequences in maths and English. In maths, we have been working on angles, area and perimeter. In English, we have started immersing ourselves in our new book all about letter writing. The children enjoyed practising some athletics activities in our PE lesson in preparation for Sports Day. Well done to all the Year 4 children for completing their times tables test this week! You can have a break from practising now!

Home learning:

World Ocean Day

This week we have celebrated World Ocean Day and for homework I would like you to pick an endangered ocean animal and create a poster or fact file about it.

Reading

We expect everyone to be reading at least five times a week. Please see the front of your home learning book for the expectations.

Maths

After looking at the different types of angles, keep an eye out in the real world and see if you can spot any in unusual places.
