## Exmoor Home Learning - 10.10.2025

This week, we have done some fantastic work in maths finding fractions of amounts, the children have used their knowledge of times tables to support this. We had some great science lessons on the heart. In English, we have been working hard on getting to know our story; how the whale became, and learning about building really high quality sentences. In topic, we looked at a map of the school and learned about co-ordinates, thinking about how the pirates of Lundy may have used maps to hide their treasure.

### **Class notices**

Well done to all the children who took part in the cross country, we are very proud of you!

### Home learning:

#### **Times Table Rockstars**

A Year 5/6 tournament has been set, so please help our class win! We spoke about how important our times tables are for fractions, so get practising.

#### **Topic**

We have been thinking about pirates and how they used treasure maps to hide their goods, so we would like you to make your very own compass using this [link](#).
