Lundy home learning - 27.02.26

It's been a busy week in year 6 this week. In English, we have learned some new skills - active and passive voice, and semi-colons for complicated lists. It has been tricky, but we have persevered! In maths, we have learned how to find equivalent fractions, decimals and percentages. In geography, we learned how the Earth's tilt and rotation affects daylight and seasons. In PE, we had Martin Brice, a cricket coach, visit school and play some cricket games with us. In science, we learned how to keep our eyes safe from the sun.

Homework

Thank you year 6s for embracing the challenge of our SATs buster booklets! As we go through these each week on a Friday morning, please bring your books in each **Thursday** so that they are ready & you have one more evening if you forget! This week, please complete the next test from each booklet.

Times Tables

Some children are finding it tricky to recall their tables facts, and this is making it difficult for them to solve fractions problems. Please could you help them to practise these - they could use:

- TT Rockstars
- Online games e.g. [Times Tables Games for 7 to 11 year olds](#)

Reading reminder

Our whole school expectation is that parents support their child to practising reading at home five times per week. This could be 5-10 minutes of reading, five times across the week. These reads can be logged on the Boom Reader app or website. Thank you for your support. I have given the logins for this app to all children who had previously lost their login.
